### About Me

I am a front-end developer based in Izmir, Turkey, with a few experiences in the last two years. I started learning programming in 2017 with the basics of HTML, CSS, JavaScript and I really love Computer Science. My interests are new web technologies, creating products and also areas related to deep learning and natural language processing. My academic education process started in 2020. Whenever possible, I also apply my passion for product development with Node.js and modern JavaScript library and frameworks such as React.js, Vue.js and Next.js. I am always open to new opportunities and cooperation, so feel free to contact me.

### Known Programming Languages and Tools

JavaScript, TypeScript

HTML5, CSS3,

Node.js, Three.js,

React.js, Vue.js, Preact,

ESLint, Vite, Jest

Redux,

Git, Postman,

Vercel, Netlify,

Element UI, Sass

TailwindCSS, Bootstrap,

Styled-Components

Figma, Adobe Ai, Adobe Ps.

### Languages

English (B2-C1)

Turkish Native

### Education

Usak University // September 2020 – Present

Computer Programming

Necip Demir // September 2013 – June 2017

High School

### Introducing Myself About Software Development

Since I started my developer career, I've usually worked on Front-End development but I can optimize your applications and provide high performance side by side. I also code and improve my programming skills to build clean structure with elegant code for Back-End and Server-side development with TypeScript and Node.js. I prefer to use Redux to manage state during development process. I love writing user interfaces and working on CSS architecture with clean code. I mostly coding in React library with TypeScript. I prefer the best UI, UX for users.

### Work Experience

Frontend Developer // September-2022 – May 2023, Izmir

ArtLeed Techs

I worked as a Frontend Developer and also focused on UI, UX design for the projects. I had many experience in React.js, Vue.js, Three.js, Preact, TypeScript, Node.js and some of the UI kit and libraries too. I mostly used Redux to state management in production. Additionally, we worked to add new features and enhance existing ones to improve the user experience.

Frontend Developer // September-2020 – August-2022, Izmir

Internship Developer Team

Front-End Developer, during my work experience I worked on some projects with C, C++, Python and I have mobile development experience with Flutter as well. I have mostly worked on various products using React, Vue.js, Three.js, TailwindCSS, Styled-Components and some IU libraries too as well. As part of my job responsibilities, I have been implementing design patterns to improve the performance and maintainability of the code. There is effective communication and collaboration were crucial for successful project completion.
